

QMO - Site Architecture/Map

quality.mozilla.org

NOTES:

- HOME -> Sections for Test, Code, Bugs, and Data are major "activity flows" for the site. Color coded content will most likely appear across the various pages for quick access (perhaps as sidebar menu items)
- Each major Navigation item should have a unique visual design template. All other pages below them will share the same basic theme.
- Only pages that may require a unique visual design and layout are the Events (to make sure the calendar fits and looks good) and Community (where we have a member photo gallery and the top tester profile view).
- Sidebar and Footer will be shared by all pages of the side (with a few exceptions)
